PROJECTS

Super master Cleaning Website

- Super Master Cleaning is services based website where clients can get Services regarding Cleaning at home offices
- As the lead front-end developer for the Super Master Cleaning Services Website project, I led the design of the Super Master Cleaning website. My job was to make it easy for people to find and book cleaning services for their homes and offices. I used coding languages like HTML, CSS, and JavaScript to create a website that looks good and works well.

Online Solution website

- I worked on a client project called One Line Solution, focusing on creating their website. My role as a front-end developer involved designing a user-friendly platform where clients can access digital marketing services. This includes services like app development, web development, SEO, and design. My work ensured the website looks good and is easy for clients to navigate, making it simple for them to request the services they need.

Hotel website

- I contributed as a front-end developer for a hotel website project. Using HTML, CSS, and JavaScript, I designed an engaging and user-friendly interface. The website showcases the hotel's amenities, room options, and booking features. With a focus on visual appeal and seamless navigation, I aimed to provide an enjoyable experience for potential guests. The responsive design ensures accessibility across various devices, allowing users to explore and book accommodations effortlessly.

Fast Food website

- I creating a fast-food website. Using HTML, CSS, and JavaScript, I designed an attractive and user-friendly interface. The website highlights the menu, special offers, and ordering options. Emphasizing a visually appealing and easy-to-navigate design, I aimed to enhance the user experience for customers looking to explore the fast-food offerings and place orders.

Blog website

- I create a blog website. Using simple codes like HTML and CSS, I made it look good and easy to use. The website is all about sharing interesting stories and information. It is easy to read and works well on phones and computers, so people can enjoy the blog wherever they are.
